

About fivestar*

With over 22 years of experience, fivestar* offers technology agnostic consulting, development, and implementation services to build tools and systems to your specific requirements with your end-users in mind.

fivestar* solutions:

- Centralize Workflows through user-centered design and a clear understanding of key workflow objectives and steps.
- Optimize Processes through business intelligence and configurable rules that shift complexity and manual work away from end-users.
- Enable Decision-Making through real-time data and comprehensive reporting tools that provide in-depth analysis and visual insights.

Our approach starts by learning about your organization, challenges, and goals. We then build a solution that is exactly right for you.

Workforce Tracking and Billing

The Workforce Tracking and Billing solution ensures the billing and tracking of employee time is accurate, consistent, and timely. The solution integrates with Microsoft Project, DevOps, and Microsoft Power BI to provide real-time assessment of employee time by project or task, validated against organizational resource usage and allocation policies.

Need

- Integrated solution to ensure that all time is recorded and tracked regularly and accurately.
- Analysis and reporting on time usage and billing by project and/or activity.
- Accurate longitudinal project reporting based on changes to employee rates and allocation over time.

Solution

- Connects with Microsoft Project or DevOps to identify gaps/irregularities in employee time tracking.
- Provides alerts to employees to ensure that time for projects/tasks is recorded in a timely manner.
- Accesses data about completion of tasks, task estimates, status, etc.
- Creates a Microsoft Power BI dashboard that provides interactive analysis about employee time usage, trends, project billing for work completed over a selected date range, including periodic changes to employee rates and assignment allocations.

Outcomes

- Significant reduction in time required to create project billing analysis (from 40+ hours to 1 hour).
- Improved timely entry and accuracy of recorded employee time at a project and task-level.
- Better insight into project financials, forecasts, and resourcing based on real-time employee data.
