

RPA doesn't reduce your workforce – it allows you to scale.

For Robotic Process Automation – the first thing people think about is the potential effect on jobs. If 20% of your employees do 80% of your work, **how do we enable the other 80% of workers to do higher value work?**

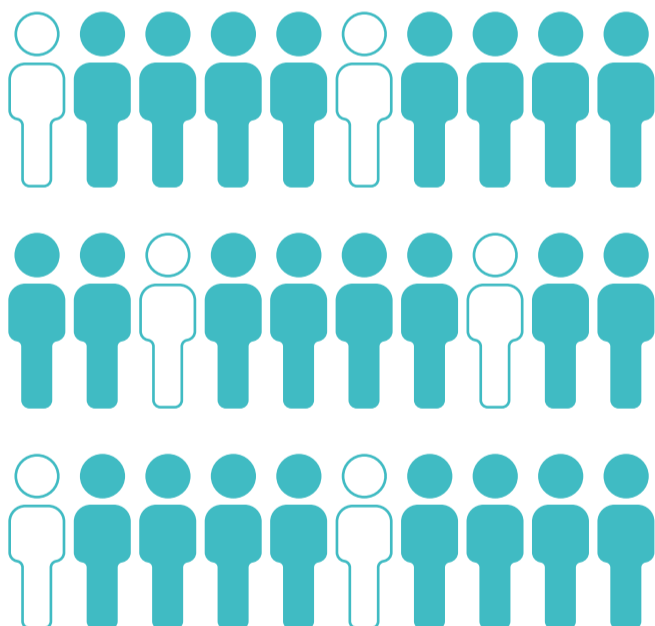

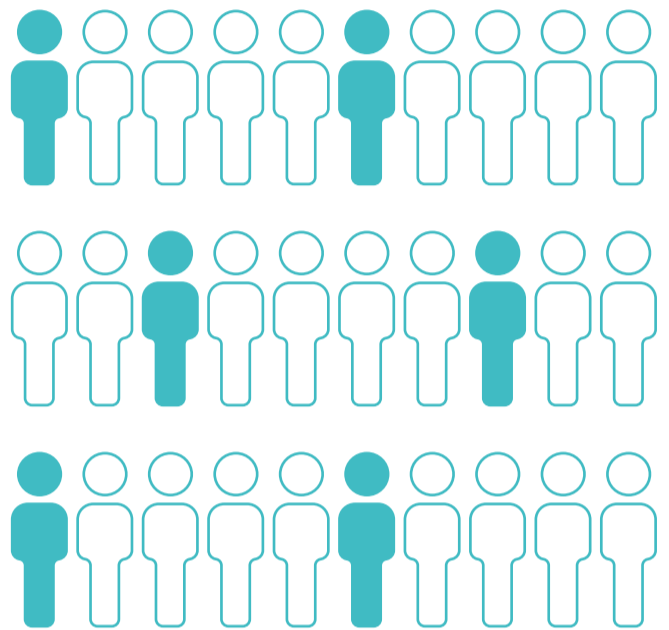

That's where RPA can help!

↓ Decreased value to the organization

Without RPA 80% of Effort on Low Value, Repetitive Work

Without RPA, these tasks make up 80% of your employees efforts

- Customer onboarding
- Data migration and entry
- Data validation
- Payroll
- Updating Inventory Records

With RPA 80% of Effort on High Value, Rewarding Work

With RPA, 80% of available time can be dedicated to these tasks

- Customer support
- Sales efforts
- Asset creation
- Upskilling
- Strategic tasks

↑ Increased value to the organization

RPA Impacts

Workplaces that use automation are **33%** more likely to improve the experience of their workers.

86% of organizations that implemented RPA felt that it improved productivity.

Companies that embraced RPA found that their workers were **38%** more engaged.

98% of IT business leaders say that automating processes is essential to driving business benefits.
